DecoScape Unveils Eclipse: Merging Design and Durability in Outdoor Design

ALL DECOSCAPE PRODUCTS ARE 100% MANUFACTURED IN-HOUSE AT THE BRAND'S STATE-OF-THE-ART MIAMI FACILITY, WHICH IS EQUIPPED WITH THE LATEST IN ADVANCED MACHINERY.

DecoScape has introduced the Eclipse Collection, a striking new line that merges clean, abstract forms with exceptional functionality. Designed with a modern aesthetic and engineered for comfort, Eclipse offers a range of seating options, each featuring a laid-back reclined design option complemented by a matching table—perfect for creating relaxing and inviting outdoor spaces.

Defined by strong geometric lines and a minimalist yet powerful presence, Eclipse balances bold structure with effortless adaptability. Crafted from a powder-coated aluminum frame and composite slats, the collection showcases a refined material composition that is both durable and visually striking. The Eclipse Collection offers a range of seating options, including Club Chairs, Swivel Club Chairs, Loveseats, and Sofas—each available with a high-back option—along with a coordinating coffee table.

Beyond its sleek design, Eclipse is crafted with comfort-driven excellence in mind. The collection promotes unparalleled relaxation through thoughtfully reclined seating angles and supportive cushioning, ensuring a relaxed yet sophisticated outdoor experience.

“We’re excited to introduce Eclipse, which showcases what can be created when high design meets craftsmanship,” says Steven Bramson, CEO of DecoScape. “By producing our products with raw materials in-house, we ensure that every piece is intentional, beautifully designed, and built to last.”

The Eclipse collection is crafted to meet the demands of outdoor living with exceptional durability—a rugged yet refined powder-coated aluminum frame and weather-resistant Durwood slats, ensuring longevity in any environment. Its customizable cushions, made from machine-washable, easy-to-maintain fabrics, offer both flexibility and personalization. Customization options include a variety of finishes and an extensive selection of fabric options, including Sunbrella® textiles and customer-supplied materials (COM).

All DecoScape products are 100% manufactured in-house at the brand’s state-of-the-art Miami facility, which is equipped with the latest in advanced machinery. This integrated production enables DecoScape to produce the material innovation behind collections like Eclipse, from raw material to final product, while also ensuring unmatched customization capabilities and industry-leading lead times. **BoF**
